

# Nevada Credit System

## Scenario Analysis - Primary Variables

- Non-Surface Anthropogenic Disturbance Area
  - Credit Regional Baseline
  - Mitigation Ratio Factors
    - Habitat Importance
    - Seasonal Habitat Scarcity
    - Proximity
  - Reserve Account
    - Base Contribution
    - Wildfire Threat Contribution
    - Competing Use Risk Contribution
- Objectives include
- Incentivize avoidance/minimization of impacts to important habitat
  - Ensure significant species benefit for impacts to important habitat
  - Incentivize mitigation to benefit the population impacted by debit
