STATE OF NEVADA Sagebrush Ecosystem Program

THE STATE OF NEVADA THROUGH THE SAGEBRUSH ECOSYSTEM PROGRAM IS ACCEPTING LETTERS OF INTEREST TO FUND PROJECTS THAT GENERATE SAGE-GROUSE HABITAT CREDITS

Must Be Received Before 5:00 P.M. PST on February 8, 2016

BACKGROUND

The State of Nevada is pleased to announce that funds are available through the Sagebrush Ecosystem Program for projects that will enhance and restore high quality greater sage-grouse habitat on private and public land. The purpose of these funds is to not only improve greater sage-grouse habitat, but to also create a supply of "compensatory mitigation credits" to be used in the Nevada Conservation Credit System.

The Nevada Conservation Credit System was developed by Nevada, for Nevada, as a mitigation system that provides incentives and rewards for land owners and managers to enhance and protect greater sage-grouse habitat. Through the credit system, habitat projects generate credits that can be sold to parties to mitigate impacts to sage-grouse habitat resulting from development projects. To learn more about the Credit System please go to <https://www.enviroaccounting.com/NVCreditSystem/Program/Home>.

This is the first of two rounds of funding that will be available for project implementation in 2016 and 2017. Up to \$1,000,000 of funding is available for projects that can be initiated in 2016. Multiple awards will be made by the Sagebrush Ecosystem Program to selected parties. Private landowners, businesses, conservation organizations, mitigation bankers and state agencies are encouraged to apply for projects that enhance and protect habitat on private and/or public land. Interested parties are asked to submit a *Letter of Interest* using the form attached to this announcement. The Sagebrush Ecosystem Technical Team will work with project proponents who meet the eligibility requirements to collect additional information necessary to evaluate how the project meets the criteria described below. The highest scoring projects within each of multiple categories will be funded.

Funding will support implementation of habitat improvements, including the development of management plans, analyses of habitat quality and completion of all materials necessary to make projects ready to sell credits through the Conservation Credit System. Funded projects will establish a mutually benefiting partnership between the project proponent and the State. The State will provide project proponents upfront financial and technical assistance necessary to implement projects that generate credits, and then future credit sales create the opportunity for both the project proponent to receive additional payments and the State to recover the funding provided so that the State can reinvest it in additional habitat projects. Terms of cost recovery will be defined with each project proponent as part of the agreement to receive funds for each funded project.

ELIGIBILITY & SELECTION CRITERIA

At a minimum, projects must meet the following eligibility criteria to be considered for funding by the Sagebrush Ecosystem Program.

Location – Projects must be in recognized greater sage-grouse habitat as defined by the [Sagebrush Ecosystem Program Management Categories Map](#).

Timeline – Projects must be able to be implemented in 2016.

Willingness to Participate in the Conservation Credit System – Project proponents must be willing to participate in the Conservation Credit System, which may include receiving additional payments for committing to long-term stewardship of the project.

Eligible projects will be evaluated according to the following selection criteria to determine funding for 2016.

Habitat Quantity & Quality – Projects will be ranked based, in part, on the size of the project, habitat quality and any impacts from surrounding structures or activities that disturb sage-grouse.

Restoration & Enhancement – Projects that implement conservation activities that restore or enhance sagebrush habitat and/or increase habitat quality, as defined by the Credit System habitat quantification tool. Project proponents are not expected to be knowledgeable of the habitat quantification tool, but rather the Sagebrush Ecosystem Technical Team will work with them to determine this criteria. Examples of restoration and enhancement activities include: pinyon-juniper removal, sagebrush seeding, removing non-essential powerlines or roads, increasing and protecting forbs in wet meadows, and adaptive grazing management.

Cost Effectiveness - Projects that clearly demonstrate their ability to restore, enhance, and protect large amounts of high quality habitat for the lowest cost.

The intent is to select high scoring projects in each the following categories: *Private Lands*, *Public Lands*, *Habitat Enhancements* and *Protecting Existing High Quality Habitat*. A project may meet the needs of multiple categories.

HOW TO APPLY

The steps include:

1. Complete the following letter of intent and send to Kacey KC (kaceykc@sagebrusheco.nv.gov) with the *SUBJECT: 2016 Habitat Letter of Interest*, by **February 8th at 5:00 P.M. PST**.
2. If your project meets the eligibility criteria, the Sagebrush Ecosystem Technical Team will then follow-up with you to further define the project specifics, define restoration and enhancement opportunities, evaluate habitat quality and provide information to inform your funding request. This will occur during the months of February and March. Note, this does not indicate a grant award, only a request for additional information. A project selection committee will use the information submitted through the letter of intent and subsequent discussions to review and score proposals related to the selection criteria.

TIMELINE:

January 15, 2016: Question and Answer conference call and webinar will be held at 2:00 pm.

Please submit questions at any time during the development of a letter of interest to Kacey KC (kaceykc@sagebrusheco.nv.gov)

February 8, 2016: Letters of Interest due by 5:00 PST

February - March 2016: Further information will be collected for eligible projects with assistance from the Sagebrush Ecosystem Technical Team

April 2016: Expected award date

May - December 2016: Project implementation period

3. The Sagebrush Ecosystem Council will approve projects for award in April.

Please contact Kacey KC (kaceykc@sagebrushhcco.nv.gov) if you have any questions or need assistance with your letter of interest. We hope you will consider applying.

LETTER OF INTEREST INSTRUCTIONS

These instructions provide additional information including submission instructions, specific descriptions for questions, and additional resources which may prove useful in the development of your *Letter of Interest*.

TIPS AND INSTRUCTIONS

Here are some tips to get you started:

Due date – *Letters of Interest* must be submitted to Kacey KC (kaceykc@sagebrushhcco.nv.gov) with the *SUBJECT: 2016 Habitat Letter of Interest*, by **February 8th at 5:00 P.M. PST**. Any materials received after this date will not be considered for this round of funding.

Save the Letter of Interest – You are encouraged to save the *Letter of Interest Form* to your desktop, so that you can access it at a later date or work on the form in stages if needed.

Register for and attend Q&A session – A *Question and Answer conference call and webinar* will be held on January 15th at 2:00 pm PST to answer respondents' questions. Please be sure to register ahead of time by emailing Kacey KC (kaceykc@sagebrushhcco.nv.gov).

Multiple projects – While we welcome multiple project entries from participants, each geographically separate or distinct project will need to be submitted as its own *Letter of Interest*. Multiple projects cannot be submitted with the same *Letter of Interest*.

Additional Materials – You are welcome and encouraged to submit additional materials that may assist the review committee in its evaluation of your project. If you wish to submit additional materials they must be in pdf form and can be attached to the submitting email (Note: maps of the project area may be in jpg or GIS shape file formats).

Adobe Form – The application is in adobe pdf format. It is fill-in enabled in any form of Adobe Reader 5.0 or higher. If you do not have Adobe Reader, go to <http://get.adobe.com/reader/> and download the latest version.

Response Format – All questions are fill-in enabled and limited to 300 words. Interested participants must fit all information into the allotted space. All questions must be filled in on the *Letter of Interest*. If a question does not apply to your project fill in that space with NA (not applicable).

We are here to help – If you have any questions at any point throughout the process, or need additional clarification please contact Kacey KC at: kaceykc@sagebrushhcco.nv.gov or 775-684-8600.

QUESTION GUIDANCE

Section 1 – Project Proponent & Partner Information

Questions 1 – 5

The information provided in this section is not related to details on the project or property, but will enable the review committee to update you on the status of your *Letter of Interest* or to follow-up with you to further define your funding request and account for any local characteristics on your project.

Question 6 – Project Partners

Please list all entities involved in the proposed project, this may include multiple landowners, managers, monitoring agencies, construction firms, or additional stakeholders.

Question 7 - Timeline

Please enter the earliest you could start implementation of the project.

Question 8 – Statement of Recognition & Accuracy

Please sign the statement indicating your understanding that your project may not be funded and that all information provided is accurate.

Section 2 - Property & Project Information

Question 9 – Number of Acres for Project

Projects may protect and enhance large areas of existing habitat and identify smaller areas for restoration. For this question, please estimate total the acreage that will be managed for habitat quality as part of the proposed project. For eligible projects, the specific restoration areas will likely be a small portion of the total project area and those restoration areas will be defined through subsequent discussion and planning.

Question 10 – Township and Section

In order to effectively locate the project, please list the township and section, if possible.

Question 11 – What is the land ownership status of the project area?

Please select all of the landowners or manager categories included in the project area.

Question 12 – Description of Project Area

This question is intended to give the review committee a general sense of the property, including the available access, topography, and physical characteristics. Potential participants are highly encouraged to submit a map of the project location. Acceptable file formats include pdf, jpg, or shape file. If submitting a map please ensure the “Organization Name” (Question 2) is included in the filename. If a shape file, please include as a zip file with your email submission. For any map submitted please ensure you check the box in the bottom right of the *Letter of Interest* form to indicate that a map is included with the application.

Question 13 – Is the proposed project within the Sage-Grouse Management area?

Projects should be located within sage-grouse habitat as identified by Sagebrush Ecosystem Program’s Management Categories Map. In order for participants and the review committee to quickly make this determination we will use the Sagebrush Ecosystem Program’s Management Categories Map updated on August 2014 and accessible here: <http://sagebrusheco.nv.gov/uploadedFiles/sagebrushconvgov/content/HSM/ManagementCategoryMap.pdf>. Please locate your project(s) location on the map and answer accordingly.

Question 14 – Which of the following are present on the property or adjacent land?

Please select all of the land characteristics that apply to your project's property or to immediately adjacent land. This is in order for the review committee to quickly get a sense of what types of conservation projects may be relevant for the property, in addition to what benefits may be achieved from funding the proposed project.

Question 15 – Briefly describe the current use of the land you are planning to restore, enhance, or manage.

Please provide a short description of the main activities which currently occur or have occurred within the past 5 years within the proposed project area. If multiple activities have or do occur, please list all, designating which are most prevalent or if certain activities are constrained to only certain parts of the project area. Be sure to identify changes such as new roads, new structures, and sagebrush clearing.

Question 16 – What habitat restoration or enhancements are you considering?

For projects that restore or enhance sagebrush habitat, please identify the activities you are considering. These may include, but are not limited to: pinyon-juniper removal, sagebrush seeding, removal of non-essential powerline, roads or other existing infrastructure, increasing and protecting forbs in wet meadows, adaptive grazing management, and creation of fuel breaks.

Please select all habitat enhancements your project may implement.

Question 17 – Have conservation funds ever been received to implement a conservation practice(s) within the proposed project area?

Please detail any other forms of funding, financial, or technical assistance which have been received previously or are currently pending related to the proposed project area. Note that receiving other forms of funding will not disqualify you from the process, but may impact strategies for future credit generation from the proposed project.

Question 18 – Is any of the proposed project area covered by a conservation easement, held by a conservation organization or agency, or otherwise had conservation values protected?

Please list all conservation instruments which may be in place on the proposed project area, including the type of instruments, parties involved, and terms. Feel free to attach additional details along with your email submission.

Question 19 – What is meant by participation in the Conservation Credit System?

The intent of the project funding is to create "credit ready" projects that will provide credits for the Nevada Conservation Credit System to mitigate for degradation of habitat that may occur from private and public infrastructure projects. The funds allocated to projects through this solicitation can be used by project proponents to improve habitat, including develop project management plans and complete all of the necessary steps to list credits for sale through the Conservation Credit System. Accepting the current funding requires the project proponent to commit to maintain habitat for a period of 5 years, and to be willing to commit to longer-term maintenance of habitat if credits are sold.

The project proponent will negotiate the price of credits with the buyer at the time of sale. The credit price will include a payment to the project proponent, and funding of a stewardship fund to cover maintenance costs for the duration of the project. Any funding provided by the State to the project will also be recovered. The terms of cost recovery will be defined with the project proponent as part of the agreement to receive funds and can include arrangements such as assigning ownership of a portion of credits to the State or agreement to repay the State if and when credits are sold.

ADDITIONAL RESOURCES

Sagebrush Ecosystem Program

<http://sagebrusheco.nv.gov/>

The Nevada Sagebrush Ecosystem Program is a collaborative, multi-disciplinary program established to protect and enhance the sagebrush landscape. The sagebrush ecosystem, in addition to being home for much of the state's plants and wildlife, is an integral part of Nevada's culture and economy. The ecosystem program is focused on providing solutions and actions to the myriad of threats challenging the condition of the ecosystem and the plants, animals, and people dependent upon the health and resiliency of this landscape.

Nevada Conservation Credit System

<https://www.enviroaccounting.com/NVCreditSystem/Program/Home>

The Conservation Credit System (Credit System) is an innovative approach to greater sage-grouse habitat protection that ensures habitat impacts from anthropogenic disturbances are fully compensated by long-term enhancement and protection of habitat that results in a net benefit for the species, while allowing appropriate development that is vital to the Nevada economy and the Nevada way of life.
