

# UPDATE ON SCIENCE AND TOOLS AVAILABLE FOR ADDRESSING RAVEN ABUNDANCE AND REDUCING THEIR IMPACTS ON GREATER SAGE-GROUSE IN NEVADA

**Peter S. Coates Ph.D.**  
**U.S. Geological Survey**  
**Western Ecological Research Center**

# Special Issue: Raven Management

22 peer-reviewed papers on raven science and management

Topics include:

- Population growth of ravens
- Synthesis of anthropogenic effects on raven demographics
- Synthesis of predation by ravens to sensitive avian species
- Expanding abundance of ravens in sage-grouse habitats
- Occupancy and density mapping
- Raven adverse impacts to snowy plovers
- Efficacy of lethal and non-lethal techniques
- Estimating raven take
- Population management strategies with software
- Rapid survey assessment
- Science-based Management of Ravens Tool (SMaRT)

All articles will be published by end of year 2022

## Problem

Expansion of raven distribution and abundance

Anthropogenic resource subsidies

Predation effects on sensitive species

## Solution

Science-based tiered framework

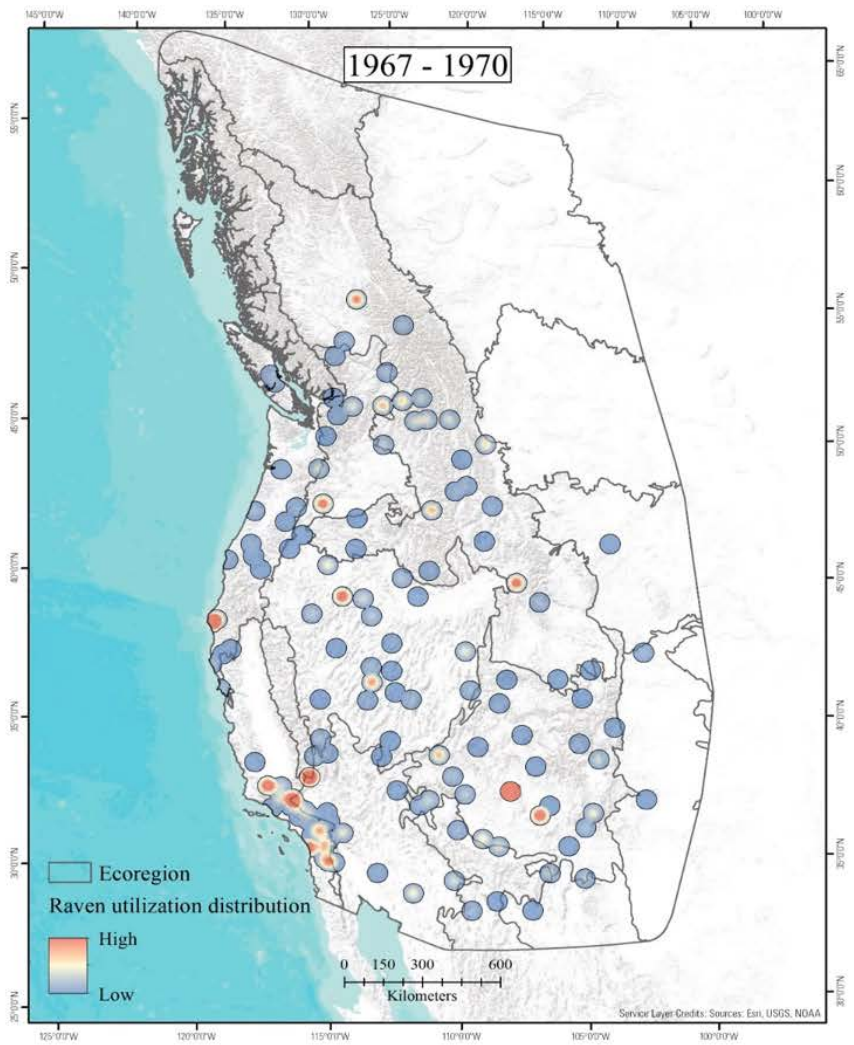

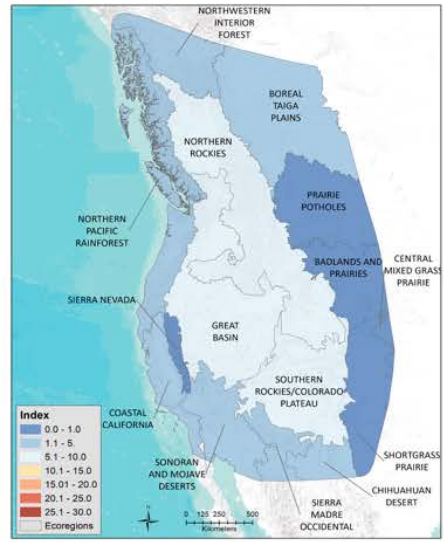

Decision support tools - SMaRT

# Overview

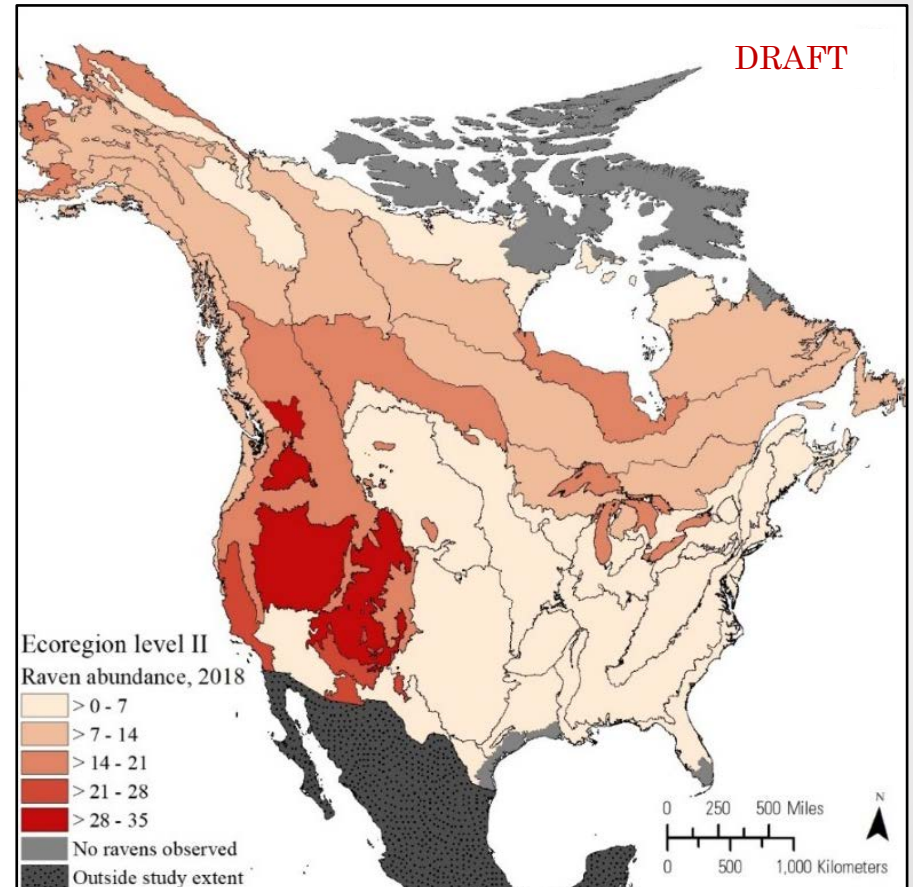

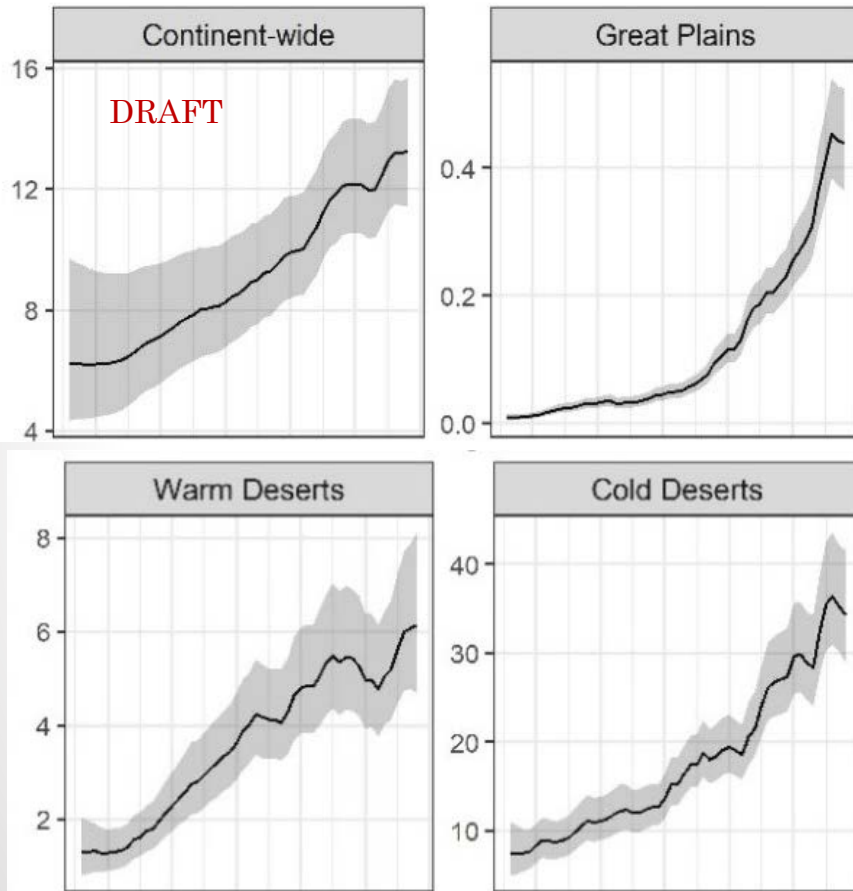

## Raven expansion in the Great Basin region of the western U.S.

Harju, S.M., et al. (2021). Estimating trends of common raven populations in North America 1966 – 2018. *Human-Wildlife Interactions* 15:5.

# Raven numbers have increased 4.6 times since 1966 in Cold Deserts

Harju, SM; Coates, PS; Dinkins, JB; Jackson, P; Chenaille, MP. *In press*. Estimating trends of common raven populations in North America, 1988 – 2018. *Human-Wildlife Interactions*.

### Select a site design option:

Upload

Design survey sites across CONUS

#### Option 1: upload

Upload your pre-defined survey site shapefile

#### Navigate to shapefile

Browse

To clear drawn shapes, use the draw toolbar. See the [user guide](#) for instructions.

**Please define survey site using one of the available options**

### Customize the map (optional):

#### Define high raven density:

Only available within the Great Basin

#### minimum density to consider

#### Upload your own guide layer

#### Navigate to guide shapefile

Browse

Select method to calculate density:

Distance Sampling

Distance sampling is the most accurate measure of raven density. See the [user guide](#) for information on parameterizing this section

### Input density from distance sampling

Enter density estimates per site sepatated by commas; e.g., site1, site2, site3

Distance sampling densities:

e.g., 0.1, 0.2, 0.3, 0.4

Density at upper CI:

e.g., 0.11, 0.21, 0.31, 0.41

Density at lower CI:

e.g., 0.09, 0.19, 0.29, 0.39

 Save Distance Sampling Estimate

Disclaimer: This software is preliminary or provisional and is subject to revision

**DRAFT**

### Identify ecological threshold

Select known threshold:

sage-grouse

**0.4**

ravens/km<sup>2</sup>

Coates et al. 2020

Save threshold

### Raven Density

Disclaimer: This software is preliminary or provisional and is subject to revision

**DRAFT**

### Review management tier

Use subsidies to subset table

[Return Tiers](#)

[Download Tiers Table](#)

Disclaimer: This software is preliminary or provisional and is subject to revision

**DRAFT**

### OPTIONAL: Target Known Subsidies

#### Known Subsidies

- Roads
- Sewage Ponds
- Landfills
- Communication Towers
- Residential/Commercial Areas
- Transmission Lines
- Telephone Poles
- Agriculture
- Livestock Burial Pits
- Livestock Feedlots
- Livestock Troughs
- Buildings/Structures
- Fences

Save Selected Subsidies

### OPTIONAL: Identify subsidies from GIS

import surveyed sites shapefile

shapefile path

Browse

8 files

Upload complete

Analyze Raven Subsidies

Map Raven Subsidies

Map interface showing a geographic area with several green polygons overlaid. The map includes navigation controls (zoom in, zoom out, full screen) on the left, a 'Download' button at the bottom left, and a 'GIS data info' button at the top right. The map shows cities like Redding, Chico, Reno, Carson City, Yuba City, Salt Lake City, Sandy, Lehi, Provo, Ogden, and Evanston. A 'Leaflet | © OpenStreetMap contributors, CC-BY-SA' footer is visible at the bottom right of the map area.

## Next Steps

- Simulate impact of subsidy reduction on raven demographics
- Simulate impacts of raven reductions on sage-grouse demographics
- Expand available guide layers to improve site design platform

### Identify ecological threshold

Select known threshold:

sage-grouse

**0.4**

ravens/km<sup>2</sup>

Coates et al. 2020

Save threshold

### Raven Density
