Sagebrush Ecosystem Program

Sagebrush Ecosystem Program Procedure in the Event of Non-Compliance

Should the SEP become aware of a person or entity's lack of compliance with the requirements set forth in Regulation R024-19, the following shall be completed:

1. The SEP Program Manager will send the person or entity a letter explaining the requirements set forth in Regulation R024-19, and inform them of their obligation and steps towards fulfilling such obligation.
2. If after 30 days, a resolution is not achieved, the SEP Program Manager will notify the appropriate land management agency of non-compliance.
3. If a resolution is not achieved after an additional 30 days, the SEP Program Manager will issue a requirement for the person or entity in violation of the requirements set forth in Regulation R024-19 to appear before the Sagebrush Ecosystem Council at the next scheduled Council meeting to explain their non-compliance.
4. Should the person or entity agree to comply at any point during this process, the process will be halted. Should an entity fall out of compliance again, the SEP Program Manager will issue a requirement for the person or entity in violation of the requirements set forth in Regulation R024-19 to appear before the Sagebrush Ecosystem Council at the next scheduled Council meeting to explain their non-compliance.
