2020 CCS Highlights

In total since inception of the program, 10 mitigation transactions have been finalized using the CCS.

Seven mitigation transactions were finalized using the CCS in 2020.

These transactions involved the sale of 1,078 credits from five private land credit developers that encompass 4,480 acres of high value sage-grouse habitats which will be conserved for a minimum of 30 years.

Five credit project proponents finalized their CCS management plans that conserve nearly 50,000 acres (16,810 credits).

It is anticipated that five additional credit projects (>30,000 acres) will be completed in early 2021.

All 17 credit project proponents submitted their annual monitoring and management reports to the SETT for review.

To date, 17 debit projects representing various industries used the HQT to quantify their debits and 11 proposed debit project proponents will use the HQT in 2021.

In consultation with the SETT, four debit projects altered their designs to minimize their impacts and mitigation obligations.
