Overview

The Nevada Sagebrush Ecosystem Program is a collaborative, multi-disciplinary program made up of the governor-appointed Sagebrush Council and the Sagebrush Ecosystem Technical Team, established to protect and enhance the sagebrush landscape. The sagebrush ecosystem, in addition to being home for much of the state's plants and wildlife, is an integral part of Nevada's culture and economy. The ecosystem program is focused on providing solutions and actions to the myriad of threats challenging the condition of the ecosystem and the plants, animals, and people dependent upon the health and resiliency of this landscape.
