

# CCS Update: August 2023

SETT: Range Camp 2023

Forty-two mitigation transactions have been finalized using the CCS since inception of the program, conserving almost 30,000 acres for at least a 30-year term.

Four mitigation transactions were finalized using the CCS so far in 2023. The entirety of that project has already been committed to be conserved according to their management plan over the long term.

The SETT met with the Estill Credit Project for their Five-Year Qualitative Assessment. These visits are good to also meet with the proponent, answer any questions, and establish/maintain relationships.

Several debit projects representing various industries are working towards their quantification of debit, either with fieldwork or moving forward with a desktop analysis.

Two debit projects are working towards offsetting their mitigation on public lands. Mitigation plans will be presented to the Council for approval when completed.

The SETT conducted trainings on the CCS to the BLM in Ely and Winnemucca, as well as online; attended Range Camp to teach Botany; and presented on the Sagebrush Ecosystem Program on Channel 2's Face the State, which aired July 23.
